ALTO 4

ALTO is an all-in-one Business Continuity and Disaster Recovery (BCDR) product line purpose-built to efficiently prevent data loss and minimize downtime for their customers.

All-in-One Business Continuity (1TB)

Built to ensure their customer's business is always on and resilient to disasters, ALTO is an all-in-one solution that includes verified backups, restore options for any scenario, instant virtualization, and ransomware protection. **ALTO is backed by Datto's private cloud so failover and recovery can be performed from the cloud with no additional configuration. Streamlined business continuity solutions save time, money, and headaches.**

ALTO 4 protects any infrastructure, with the **ability to spin up lost servers in minutes in the secure Datto Cloud** — without the need for additional tools.

- All-in-one BCDR solution built for **small business**. The ALTO offers **enterprise protection at an affordable rate**.
- Replicate backups to the Datto Cloud for disaster recovery
- Recover granular data quickly from multiple points in time
- **Virtualize protected servers in the Datto Cloud**
- **Data stored on 2 separate locations (local hardware and one off-site data center)**

Maximizing Uptime

Going beyond simply recovering data, business continuity saves businesses by keeping them online in the face of otherwise devastating issues such as ransomware, malware, natural disasters, network downtime, and costly human errors. Datto's breadth of restore tools are fit for any job and designed to get you back to production faster by taking out the guesswork. Backups are stored in the Datto Cloud so that any snapshot can be used to restore or virtualize. Restore options range from granular restores, which can target specific files, to full system restores, which include instant virtualization to keep you online. With the ability to immediately get back up and running from the Datto Cloud, you have an edge when local competitors lack the ability to bounce back as quickly.
