

SIRIS 5

SIRIS is an all-in-one Business Continuity and Disaster Recovery (BCDR) product line purpose-built to efficiently prevent data loss and minimize downtime.

All-in-One Business Continuity

Built to ensure business is always on and resilient to disasters, SIRIS is an all-in-one solution that includes verified backups, restore options for any scenario, instant virtualization, and ransomware protection. **SIRIS is backed by Datto's private cloud so backup, failover, and recovery can be performed locally or in the cloud with no additional configuration. Streamlined business continuity solutions save time, money, and headaches.**

BCDR (1TB – 100TB)

Get back to business in minutes. SIRIS is the first fully-featured total data protection platform delivered in a single integrated package.

- All-in-one BCDR solution built for **small to medium sized enterprises**
- Server images replicated to the Datto Cloud for disaster recovery
- Data restored from any point in time
- **Virtualize protected servers locally or in the Datto Cloud**
- **Replication to secondary data Center**
- **Data stored on 3 separate locations (local hardware and two off-site data centers)**

Raising the Bar for Reliability

Extensive restore times from file backups, backup failures, and inability to restore data for customers are major pain points. Datto eliminates those concerns by designing and delivering better backup and restore options. Reliability begins with knowing your backup is always good. **Datto eliminates the need to worry if the system will boot or be recoverable by automatically verifying backups will boot with all data intact and no ransomware**, giving you 100% confidence in your backups and ability to restore. Keep data in the Datto Cloud indefinitely with Infinite Cloud Retention and perform all restore tasks directly from the Datto Cloud. With backup, you can count on the ability to failover and restore from anywhere.
